

The price for publishing Summons in the District or Superior Court has been reduced to \$15.00. Sheriff's Sale inserted at the same price.

LOCAL INTELLIGENCE.

SATURDAY.

A few hat falls of type. It's going to be condemned.

Sp. Jackson, from Kirkland Valley, came up from his home yesterday.

It is rumored that water is somewhat scarce at the Peck. Hope the rumor is unfounded.

Connelly & Armijo's ten teams, laden with lumber for Gillett, passed through town this afternoon.

Mr. Whipple, from Skull Valley, brought into town, to-day, about the best load of hay that has been in market this season.

Chas. Allabach took the stage this morning for Phoenix, to rusticate a few weeks in Salt River's semi-tropical sun.

New Mexico, we learn from Mr. Calvin Keys, who was many years since a resident of that Territory, and who has just passed through it, is quite dull, as is also Colorado.

Atkinson & Rasher's train left this morning for Ehrenburg, where goods will be in readiness to load them.

George Banghart, Esq., a pioneer of Chino Valley, has purchased a large lot of fruit trees from Gooding & Armstrong, and has planted them on his valuable place.

The following are the arrivals by this morning's stage: Mr. Gashwiler, W. C. Flint, C. E. Bowen, wife and child, W. S. Hobart, B. L. Lewis, A. Goldman, and E. P. Nichols.

Another big door frame was reared up at the south end of the Court-house building yesterday afternoon; the walls are crawling up slowly but steadily, and can be seen after off.

Mr. Rothrock is finishing up a number of views recently taken here, and at Verde.

He has quite a nice display of Arizona scenery in his window, and on the walls of his office, on Montezuma street.

Improvement.—Campbell & Parker this morning, took the North half of the old Montezuma House out and are putting in a sash front instead. P. Kearney is having the place fixed up in tip top style for a bountiful saloon.

B. A. Smith is having the old butcher shop one door south of Blake & Co's Assay office fixed up for a fine saloon which will be opened in a day or two. If there is any branch of industry that is neglected in Prescott it is the saloon business.

Jesus Otero, a Salt Riverite and one of the oldest residents in this section of Arizona, went to Signal City from Phoenix with a load of barley and came back by Prescott for lumber which he has purchased, loaded on his wagon and is ready to start for his home to-morrow morning.

The usual Saturday auction at the store of J. L. Fisher & Co., did not come off, to-day, owing to the scarcity of people in town. Rather singular that the town should be empty on Saturday, and not, too, when the merchants were called upon to meet by a few hungry hangers-on to the Democratic party. The whole refuses to bite at the bait of the minnow.

Music.—The flattest, most insipid, incoherent, rapid, tasteless, and entirely harmless attempt at witty composition we have ever been capped into reading, was published in the Enterprise, Thursday afternoon, under the caption "Telephone" without a word of apology from the Editor for inflicting such a mass of trash on his readers.

Had he explained that the author was a simpleton to whom he was under obligations for mental services performed, and that on that account he could not well decline his contribution, it would have been some relief, but to set it before the public without a word of warning as to its savourless character was an outrage.

Perkless.—Messrs. Myers and Hubbard have been plying on Turkey Creek, and decided to "plant" on the Peerless mine. Mr. Myers has taken a bond from the owners, and they are going to work to take out rock and prospect the ground immediately. The ore taken out will be worked at Master's mill, and in the meantime sinking will continue. Mr. Hubbard, who is a practical miner, has been foreman of the Peck, and is familiar with nearly every prominent mining location in Tiger, Peck, Humburg, Turkey Creek and Hassayampa districts, thinks the Peerless about the best prospect for a valuable mine that he has seen, outside of those that are already developed and being successfully worked. The Peerless is situated near Pat Hamilton's location.

DEMOCRATS.—The Yavapai County Democratic Committee met to-day, at the office of Paul Weber, a good one, for the purpose of testing the feasibility of effecting an organization throughout the Territory. We are satisfied that those who met are convinced that the meeting was a failure, and that an organization of the party will be out of the question this year. Yavapai demands it as her right to send a Delegate to the next Congress, and none save a man who comes out on the Independent platform can be elected. The people will hardly throw away the opportunity of securing the next Delegate just to gratify the personal desires of any one man. Should the Democrats, however, by any hook or crook, effect an organization in the County whereby their strength may be tested, after having found out that they are so far in the minority, will undoubtedly be more anxious to disorganize than they are to split out from their friends who have done much for the Territory, in fact nearly all, for so many long years.

ON THE WAY TO CALIFORNIA.

TOLL-HOUSE, COUNTY ROAD, Yavapai Co. A. T. Jan. 30, 1878.

Ed. MIER.—This morning folks are wending our way west in our cozy wagon, through this beautiful country. These rocks arise along here formed by the hand of nature, upon which grow evergreens, cactus and various other plants are truly delightful to behold. This excellent road reminds one of the good old "days of yore" and of crossing the Alleghany Mountains over the turn-pike road.

SKULL VALLEY, SUNDAY, 27th.

The appearance of this country is quite surprising. The soil is very good, and the people are fixing to stop here some time, as they are prospecting the hills and acquiring the subject of building a school house. It seems from the amount of hay coming out, that there is gold in the valley as well as in the hills surrounding it.

DATE CREEK.

There are some of nature's strange freaks. The rugged mountains which rise up, strangely contrast with the murmuring rivulets and the growing vegetation. Here we see the wild, overgrown, fresh and green; the older in hill foliage, and the willow, and something resembling cotton-wool in bloom, and still further along we see a variety of cactus, sage, and what we call the devil's walking cane, which, I believe, the country folk call the cactus family and common wood. More soon.

THE WELL BORN.—Gosper & Lount have received notice that their well boring machinery has arrived at Yuma. It is probably on the Cocopah, which sailed yesterday and ought to be at Ehrenburg about the sixth.

If no unusual delays occur we may expect the big Auger about the 25th, when we understand it will be immediately set to work under the supervision of J. E. Anderson Esq., to bore a well for C. C. Bean at his residence on Alarcon street. If it works successfully, of which there can be but little doubt, the next move will be to set up one of their Halladay Windmills to raise water from the well into a tank to be used in irrigating the grounds, household use, etc.

Some people try to do business without advertising. The same thing has been tried in other countries, but it never did work nor never will. As well might a teamster undertake to haul freight without using axle grease. No business man who understands the principles upon which business is transacted, ever thinks of attempting to do business without advertising. On the contrary, they understand that the very first requisite to successful business is to advertise, in the most public manner possible, their ability and willingness to do business, and the fact of a liberal advertisement is evidence to the trade that the advertiser is a liberal dealer.

The organization, that the Great Organizer organized, has a functional derangement of the organic organism and the organ of the organizers has an organist, but the strains of his organ are the thinnest kind of organ, and the organizers that he organized are so inorganic and the adhesive tissue by which they are held in place is like the ligatures that confine the Vertebrae of the joint snake, which Prentice said

"may be ranked a wonder, For when provoked it lies assunder."

Mr. Pat Hamilton has shown us samples of ore from his Trinity mine, from the 40-foot level which has lead over two foot wide, and a rich pay streak of ten inches. The samples brought by Mr. Hamilton are of a dark gray silver color, and is thought by good judges of the ore, that they are worth over \$800 to the ton. The mine is conveniently located to Master's mill, and it is the intention to have his ore worked at that handy installation.

Sanford's Radical Cure for Catarrh, is growing in favor where ever it has been tried. A great many people are suffering from nasal catarrh, and catarrh of the throat, and eyes, and it is thought by good judges, easily administered by means of an inhalant tube, which accompanies each bottle, and never fails to benefit the sufferer. Lincoln & Herrick advertise the remedy for sale, at their drug store, in Head's block.

A. Goldman, brother to Charley, a successful merchant of Phoenix, arrived by stage this morning, and will remain in Prescott for a short period. He tells us that our old friend, Mr. Wormser, has planted this season about 400 acres in wheat, barley. Planting of grain is about over in the valley, and as a general thing the growing crops are looking well.

Coal. Wood came up last evening from the Kit Carson mine, and reports that he is going down in the south shaft, and connecting the two shafts according to his original plan, and the mine nor the ore never looked so well as now. He proposes to continue work until the mine is thoroughly opened, so that an ore visiting it can see and know just what there is there.

BONDED.—P. T. Nougues and Charles Silent have taken bonds for what is known as the Smith mill and mining property, adjoining the old Vulture mine, as follows: P. W. Smith, \$90,000; W. J. Jones, \$30,000; P. Brill, \$10,000; A. H. Peoples, \$3,500. Total, \$140,000.

A. B. Spence and family who reside on Alexander's ranch, above town, are about to remove to Wolf Creek, on the Agua Fria river, to the Peck mine, where Mr. Patterson is erecting a house for a Station. Mr. Spence will have charge, not only of the Station, but the toll-road and toll-gate.

The small ranch just above George Lount's place, on Granite Creek, belonging to S. O. Frederick, was sold to-day by the Sheriff, to satisfy a claim of G. W. Curtis. C. B. Rush, Esq., bought the property for Curtis, for the sum of \$120.83, being the claim with costs added.

W. B. Helling has sold his Cave Creek mine for sure, and is to receive on the 15th of this month the sum of \$10,000, and of seventy thousand dollars for the same. His friends throughout the Territory are glad to hear of his good fortune.

Tim Hawkins & Co., have opened a Restaurant at the Nifty for the accommodation of the hungry. Tim's cooking is well known in Prescott, and it only needs to be known that he is at the helm to secure a house full of cash customers at his dining hall. See his advertisement.

Mr. Senteny of Point of Rocks, George Banghart of Little Chino, George Opykne from Alexandria, Adam Shupp of Skull Valley, John Moon, the Patriarch of the road, and many other good people from the body of the County, are in town to-day.

MORDEY.

S. C. Rees, of Chino Valley, continues to supply his regular customers with alfalfa hay at an excellent quality.

John Dolan informs us that himself and partner have bonded a mine in the Tiger district to some San Francisco capitalists, for the sum of \$15,000, and are soon to receive their money.

We were pleased to meet our old neighbor and friend, the Hon W. J. O'Neil, in town yesterday, from Kirkland Valley. Mr. O'Neil is one of Yavapai's staunchest men.

Perfecto Armijo is having bad luck, losing his mules. He advertises two more to-day for the return of which he is willing to pay.

At Constable's sale, this forenoon, 750 feet in the Morning Glory mine, Turkey Creek district, belonging to A. T. Scott, were sold to satisfy a claim of O. A. Ensign, in the amount of \$103.63. The property was bid in by Fred Williams, for \$300.

We have seen some very good-looking silver rock which was brought in from the vicinity of Kirkland Valley. It is being assayed, and when the correct value is ascertained shall give it to our readers. In the meantime prepare yourselves for something startling.

NEW RESTAURANT.—The new restaurant, under Tim Hawkins & Co's management, in the back portion of C. F. Cato's building, opened yesterday morning, with a flattering prospect for financial success. Ten regular cash bakers are on hand, and business quite a large number of ready-pay customers by the day. Everything about the dining-room and kitchen looks white (I) and clean. The food is said to be excellent, and the restaurant, take it all in all, is quite a convenience.

THAT REMAY.—By request of Tim Hawkins we publish the following:

PRESCOTT, A. T., Jan. 4.

Sample of ore reported from the Tim Hawkins' mine, located by Tim Hawkins, Esq., who never pays for anything, goes per ton in silver, \$250 & 25% cents.

OTTO & PARK, Ramseyers.

[ANALYTICAL REWAY IN 100 PARTS:]

Machine sub-carbonate 13.00

Nitrate of magnesia 10.75

Roman imp 1.50

Silver 60.00

Total 100.00

Locations Recorded for January.

The following is a list of the Mining Claims recorded in the County Recorder's office during the month of January.

SKIDDEE.—Copper.—Copper Mountain District, by J. M. Gleason and E. V. Thompson.

THOMPSON.—Copper.—Same Dist. by J. M. Gleason, P. F. Hoxie, Henry Booth, L. B. Sweeney, E. V. Thompson and E. E. Burlingame.

GILBERT.—Silver.—Humburg Dist. by Geo. H. Fitch and Geo. E. Brown.

SILVER BELT.—Silver.—Extension of the Oro Bonito, Tiger Dist. by Horace B. Cram.

RED WARRIOR.—Gold and Silver.—Cherry Creek, Black Hills Dist. by H. A. Reynolds.

KIT CARSON.—Silver.—Blind Indian Creek, Walnut Grove Dist. by Geo. W. Walker.

LIZIE.—Silver.—Humburg Dist. by S. M. Waterman, J. S. Black, Lizie Ann.

SILVER ACE.—Silver.—Humburg Dist. by J. M. Gilbert, R. Grady, J. L. Fisher and Chas. Keys.

YANKEE.—Silver.—Same District and parties.

BARTANA.—First West Corner Extension, Copper Mountain Dist. by J. M. Gleason.

RENO.—Humburg Dist. by B. C. Williams, T. W. Otis, James Hanson and W. M. Ridgely.

ALPINE.—Humburg Dist. by William Jones & Co., B. C. Williams, W. F. Jones and D. P. Pembroke.

BUCKETT.—Silver.—Pine Grove Dist. by Geo. Oswald.

CANYON.—Gold and Silver.—Humburg Dist. by T. J. Drum.

BRYAN.—Silver and Gold.—Dist not given, by Abraham Pearson.

DURANGO.—Silver.—Humburg Dist. by D. W. Bryan.

NOODAY.—Silver and Gold.—Humburg Dist. by D. W. Bryan.

ARGENT.—Mineral.—Humburg Dist. by P. McAllister, Dan Shaw and C. A. Reynolds.

SKIDDEE.—Quartz ledge.—M. W. Ridgely, B. C. Williams and James Hanson.

TUESDAY.

Meeting of the Village Council.

The Village Council met at the office of Recorder Carter, Tuesday evening, Feb. 4. Present, Mayor Ellis, Councilmen, Allen, Hatz and Spencer, and Recorder Carter. Minutes of last meeting read and approved. The following bills were audited, allowed and ordered paid:

J. M. Dodson, part of a month's salary as Street and Fire Commissioner, \$80; G. Hathaway, hauling away refuse lumber, \$23; T. H. Lucas, work on street crossing, \$23; Wash French, Night Watchman one month, \$10; Jones, hauling away dead mules, \$5; J. G. Brock, Night Watchman, part of one month, \$80; Murphy, cleaning streets, \$8. The Committee appointed to investigate and report on the necessity, cost, etc., of erecting a foot bridge across Granite Creek, at the crossing of Gurley street, reported that it was unnecessary and on motion of Allen seconded by Spencer the matter was laid on the table.

The Village printing and advertising for the ensuing year was awarded to C. W. Beach of the ARIZONA MINER, on the same terms as last year, he being the only bidder. The Clerk was authorized to order all necessary printing and advertising.

Councilman Allen offered two new ordinances, neither one of which met with a second, viz: one to repeal the ordinance for the collection of all licenses, thus entirely doing away with the collection of any licenses whatever, and the other to raise the Salary of the Street and Fire Commissioner from \$75 to \$100 per month.

Some discussion ensued on the necessity for one or two Night Watchmen, and the matter was laid over until the next meeting. Mayor Ellis then presented several points for the collection of all licenses, thus entirely doing away with the collection of any licenses whatever, and the other to raise the Salary of the Street and Fire Commissioner from \$75 to \$100 per month.

Councilman Hatz and Spencer were appointed as a Committee to superintend the laying of the crossing of the ditch, corner of Montezuma and Goodwin streets, and directed to have the bottom paved with cobble stones and covered or grouted with sand so as to bear up heavy freight wagons, after which the Council adjourned until their next regular meeting on the first Monday in March.

George S. Porter & Co., have an attractive advertisement in to-day's paper. It is astonishing how cheaply everything can be done in these days of low prices. Miners, shoe-makers, iron-pumpers and mule-skinner can now afford to have their cabins carpeted, lined and papered, camp-stools upholstered, sofas in their parlors, settees at their cabin doors and black walnut what-nots in every corner, all for less than it used to cost to live in the dirt and sit on single blocks or old tortillas and frioles flung about on the bare ground.

Verily this is an age of reform in more than spiritual things.

Just as the Ministers are about to demonstrate that there is no hell in the hereafter, our mechanics and merchants are doing all they can to abolish what there is left of it here in Arizona, especially in Prescott.

The devil of high prices is chained, whether for a thousand years or a shorter period we can't say, but it is bound for the present, and a millennial reign of low prices has set in. If it falls short of millennial or centennial it will probably serve all the purposes of the present residents.

C. A. Luke and P. T. Nougues, left this morning for a trip of inspection to the different mines in Peck and Tiger Districts. Mr. N. goes to the Bradshaw principally for the purpose of looking at the Bradshaw Basin Mill and Mining Co's, property with a view of purchasing the same. The mill is surrounded by a large forest of pine and juniper timber, together with numerous rich lodes of the precious metal, and all that is necessary to insure perfect success is a complete mill and proper management.

We publish, to-day, the remainder of an article commenced in yesterday's Daily from the extensive, and researching brain of our fellow-townsmen J. M. Sanford, on "The Worship of the Heavens Gods." The subject is treated with logic and great reason, and exhibits many new and entirely original theories, which will be one of the best articles we have ever published in this paper.

Mr. Peter Harry has been in Prescott since Saturday last. Some time since Mr. Harry had occasion (as we hear it) to inflict injuries upon a certain Mexican, in the employ of S. M. Wessels at Bradshaw, as a means of self defense, and his business here at the present time is to have an examination and prove himself justifiable in the premises.

James McE and George Opykne came in from the Peck, yesterday. McE says the Peck Co. have as good a ten-stamp mill as ever was built, perfect in every particular, and a plentiful supply of as high-grade ore as ever came out of a mine, but it would be a better place to camp if wood, water and grain were a little more plentiful. Wood is in short, water is not an absolute necessity in winter, but grain is essential, and hard to come at.
